SUMMARY

Full-stack developer with 3+ years building and running production web applications end to end. Currently lead the technology function at a coaching company, where I architected, built, and deployed a multi-site video learning platform serving 200+ programs and 7TB of content, and coordinate a team of consultant developers. Comfortable across the stack — React/TypeScript front-ends, Node/Express/MongoDB back-ends, and increasingly Next.js and Supabase. A background in high-volume technical support at Apple gives me a strong instinct for users and for translating between technical and non-technical stakeholders.

TECHNICAL SKILLS

- **Front-End:** React.js, Next.js, TypeScript, JavaScript, Vite, Material-UI, TanStack Query, React Hook Form, HTML/CSS
- **Back-End:** Node.js, Express.js, MongoDB, Supabase, RESTful APIs
- **DevOps & Tools:** Git/GitHub, GitHub Actions (CI/CD), Render, Netlify, Vercel, Vimeo API
- **Practices:** Full-stack development, technical leadership, Agile, Keap CRM integration

EXPERIENCE

Technical Lead & Software Engineer · April 2023 – Present

Alpha Femme · Remote, Canada

- Own the company's technology end to end: architecture, development, deployment, and production support of a full-stack video learning platform.
- Architected and built a multi-site platform (Alpha Femme & Alpha-HD) on a React/TypeScript/Vite front-end and Node/Express/MongoDB back-end, deployed via a GitHub Actions CI/CD pipeline to Redis, Render and Netlify.
- Platform serves 200+ programs and 7TB of video content; designed the MongoDB schemas and built an admin dashboard letting content managers assemble complex program hierarchies (bundles, memberships, combos).
- Led the migration of the 7TB video library from YouTube to Vimeo, including French-subtitle integration across 200+ programs for an international audience.
- Built progress-tracking and timestamped note-taking features to support the learning experience.
- Integrated Keap CRM for automated client onboarding.
- Introduce new technologies to the team, and act as the bridge for new features and production issues.
- Lead a platform-unification initiative in collaboration with Deloitte and the consultant team. Migrating features to Next.js and Supabase (in production) while consolidating infrastructure and adding new functionality.

Apple · November 2018 – April 2023

Montreal, QC

- **Genius (Technical Specialist), Jan 2022 - Apr 2023:** Diagnosed and repaired complex Mac, iPhone, and iPad hardware/software issues in a high-volume environment; first technician in-store to successfully repair the Mac Studio Display. Mentored and trained fellow Geniuses on advanced repair and diagnostic workflows.
- **Technical Expert, Mar 2020 - Jan 2022:** Delivered technical support and product demonstrations across the iOS ecosystem, explaining complex concepts to non-technical customers. During the COVID store closure, supported customers remotely via RCC (Retail Customer Care) while completing technical training, returning in-store full-time in September 2020.
- **Specialist, Nov 2018 - Mar 2020:** Premium consultative sales in a high-volume retail setting.

Earlier Experience - Hospitality & Retail · 2015 – 2018

- Head Waiter / Assistant Manager, Guaca&Mole, Montreal (2017–2018); Apple Specialist, Dubai (2016–2017); Chef de Rang, La Petite Maison (Michelin-level), Dubai (2015–2016).

EDUCATION

- **Diploma, Full-Stack Web Development** — Concordia University, Montreal · 2023
- **MBA, Hospitality Management** — Vatel, France · 2012–2014 (co-certified by Université de Perpignan & Eurhodip)

- **Bachelor's Degree in Hotel & Tourism Management** (Licenciatura en Administración Hotelera y Turística) —
Escuela Bancaria y Comercial, Mexico · 2010–2012
